

Dear Aquatics Student,

Thank you for your interest in swimming classes through Harper College Continuing Education. We appreciate the opportunity to help children and adults develop skills in the water. We have some important news to share with you concerning our facilities.

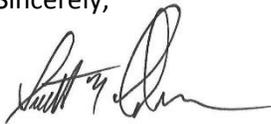

As you know, Harper College strives to provide our communities with high quality facilities for teaching and learning. Building M and the pool are more than 40 years old and are in need of a significant repair and renovation. Earlier this summer, the Harper College Board of Trustees approved a major renovation project, which will require that that Building M and the pool close for approximately 18 months.

At the end of the fall semester, December 2016, we will discontinue offering classes in Building M including the pool. While some of our fitness and wellness classes currently offered in Building M will be relocated to other facilities, we will not offer swim classes during the renovation period. When the building reopens, the pool will be completely renovated and will operate in partnership with the Palatine Park District.

We realize that you may want to look for alternatives during this period and urge you to look to your local park district or YMCA for swim classes. They share our commitment to bringing quality instruction to the community.

We have an excellent staff in our Aquatic Program and hope that you will continue on with them through the fall semester. We thank you for your understanding and hope that you are as excited about the eventual outcome of the project as we are.

Sincerely,

Scott Cashman, Ph.D.
